

NYSC CORPS MEMBER PATHWAY · GET GLOBAL WORKFORCE READY

Global Workforce Ready

A three-day course on landing — and keeping — a remote role with a UK, US, Canadian, or Australian employer. Two hours a day, plus a one-hour live practical on Google Meet.

3

days

7 hrs

Facilitator deck & learner guide

Deeptalent Platform Limited
Banbury, UK · Lagos, Nigeria

Work global. Stay in Nigeria.

WHY THIS COURSE EXISTS

The market is real. The bar is high. The gap is closable.

UK finance salaries have risen 28–34% since 2020. Compliance roles take four months or more to fill. SMEs cannot afford a £55,000 London analyst — but they will pay well for a credentialled professional who works their hours, writes clearly, and delivers without supervision.

That professional is not defined by geography. It is defined by readiness. This course closes the readiness gap in three specific areas: employability skills, global work culture and time discipline, and the AI tools that global teams now expect you to use.

14–21

Three days. Seven hours. One outcome: global workforce ready.

DAY 1

Employability foundations

- | | | |
|-----|---------------------------------|--------|
| 1.1 | The global remote market | 30 min |
| 1.2 | Your global-ready profile | 40 min |
| 1.3 | Communicating with global teams | 30 min |
| 1.4 | Workshop: rewrite & send | 20 min |

DAY 2

Culture, time zones & self-management

- | | | |
|-----|------------------------------------|--------|
| 2.1 | Global work culture decoded | 30 min |
| 2.2 | Time zones & the remote day | 40 min |
| 2.3 | Time management that survives NEPA | 30 min |
| 2.4 | Workshop: plan a two-zone week | 20 min |

DAY 3

AI tools & landing the role

- | | | |
|-----|----------------------------------|--------|
| 3.1 | Your AI toolkit | 35 min |
| 3.2 | AI in your function, responsibly | 30 min |
| 3.3 | Vetting, interviews & offers | 35 min |
| 3.4 | Capstone & readiness check | 20 min |
| 3.5 | Live practical · Google Meet | 60 min |

By the end of Day 3, every learner can:

Present a verified profile

A two-page international CV, an employer-facing LinkedIn, and proof of credentials (ICAN, ACCA, ACAMS, certifications) ready for vetting.

Write and speak for global teams

Clear, direct, low-context English — in email, Slack, and on camera — without the habits that mark a candidate as untested.

Operate inside global work culture

Ownership, documentation, honest status updates, and asking early — the behaviours UK and US managers actually reward.

Master time zones and the remote day

Convert WAT to any client zone instantly, protect overlap hours, and hand work across zones without dropping it.

Use AI tools to deliver faster, safely

Draft, summarise, analyse, and check work with AI — while protecting client data and keeping human judgement central.

Pass vetting and the interview

Know Deeptalent's assessment stages, prepare STAR answers, run a professional video setup, and spot job scams.

DAY 1

Employability foundations

What global employers actually screen for, how to present a profile that passes, and how to communicate like someone who has already worked internationally.

2 hours · 4 modules

TODAY'S RUNNING ORDER

- 1.1 The global remote market**
Roles, employers, and the real hiring bar · 30 min
- 1.2 Your global-ready profile**
CV, LinkedIn, proof of credentials · 40 min
- 1.3 Communicating with global teams**
Email, chat, and voice for low-context cultures · 30 min
- 1.4 Workshop**
Rewrite one CV bullet and one email · 20 min

MODULE 1.1

The global remote market: where a corps member fits

Who hires, and for what

- SMEs in the UK, US, Canada, and Australia — 10 to 200 staff, no offshore HR, one to three roles at a time.
- Finance & accounting: bookkeeping, AP/AR, FP&A, credit risk, audit support.
- Compliance: KYC/AML analysts, onboarding, transaction monitoring.
- Technology & data: full-stack, cloud/DevOps, BI dashboards, automation.
- Customer experience and executive operations: support, CRM, calendar and project coordination.

Deeptalent places professionals into fully managed roles — contracting, compliance, and payroll are handled for you. Your job is to be the person the client would never want to replace.

WHAT THE SCREEN ACTUALLY TESTS

01 Credentials that can be verified

ICAN, ACCA, ACAMS, CFA levels, cloud and data certifications — with membership numbers.

02 Evidence, not adjectives

Numbers: reconciled 1,200 transactions monthly; cut close time from 9 to 5 days.

03 Written English under time pressure

A 10-minute written task reveals more than an hour of talking.

04 Reliability signals

Do you reply within a working day? Do you show up on time to a 15-minute call?

05 Work readiness

Power, internet, quiet space, a laptop that works — and a plan B for each.

MODULE 1.2

Your global-ready profile: CV, LinkedIn, and proof

The international CV

- Two pages maximum. Reverse chronological. PDF, named Firstname-Lastname-CV.pdf.
- No photo, date of birth, marital status, state of origin, or religion — UK and US employers treat these as red flags, not context.
- Every bullet = action + scope + result with a number. 'Prepared monthly management accounts for a ₦2bn loan book; cut reporting time by 30%.'
- NYSC year is real experience: state the PPA, the function, and what you delivered.
- Credentials block near the top: qualification, awarding body, membership number, year.

LinkedIn that employers read

- Headline = role + credential, not 'Corps member'. 'KYC/AML Analyst · ACAMS (in progress) · Financial crime compliance'.
- About section: 3 short paragraphs — what you do, proof, what you want. Written in first person.
- Professional photo: plain background, shoulders up, neutral expression, good light.
- Custom URL, location set to Lagos (or your city), open-to-work visible to recruiters only.
- Comment substantively on posts in your field twice a week — that is how you get found.

Proof that survives verification

- Scan certificates, transcripts, and membership cards into one indexed PDF.
- Two referees who can be reached by email and phone — tell them first.
- A portfolio of work: a reconciled ledger template, a dashboard, a policy summary, a repository. Anonymise client data.
- Consistent name and dates across CV, LinkedIn, certificates, and passport. One mismatch fails verification.
- Professional email: firstname.lastname@ — never a nickname or a number string.

MODULE 1.3

Communicating with global teams: say less, mean more

UK and US workplaces are low-context: the words carry the meaning, hierarchy is soft, and directness is respect. These habits are not wrong in Nigeria — they simply do not translate.

Instead of	Write or say	Why it matters
"Kindly do the needful."	"Could you approve the invoice by Thursday?"	Names the action, the owner, and the deadline.
"Good morning sir / ma. I hope this mail finds you well."	"Hi Sarah, quick update on the Q3 reconciliation:"	First names are standard, even for the CEO. Lead with the point.
"I will revert."	"I'll send the figures by 3pm your time."	A commitment with a time beats a promise without one.
Silence when stuck	"I'm blocked on X. I've tried A and B. Can you point me to C?"	Asking early is competence; asking late is a risk to the team.
"It has been done."	"Done — file is in the shared folder, link below."	Show the evidence. Passive voice hides who did what.
Long formal paragraphs in chat	One line, a bullet list, a clear ask	Slack and Teams reward brevity and scannability.

MODULE 1.4 · WORKSHOP

Rewrite and send

TASK A · 8 MIN

Rewrite three CV bullets

Take your three weakest bullets. Convert each to action + scope + result with a number. Swap with a partner and score each other's for clarity.

TASK B · 8 MIN

Rewrite one real email

Take the last professional email you sent. Rewrite it for a UK manager: first name, point first, one clear ask, deadline in their time zone.

HOMEWORK · BEFORE DAY 2

Fix your profile

Update your LinkedIn headline and About section. Assemble your credentials PDF. Bring your CV to Day 2 — we will use it in the time-zone exercise.

Facilitator check: collect one rewritten bullet from every learner. If it has no number, it is not finished.

DAY 2

Culture, time zones & self-management

How global teams actually behave, how to work across five time zones from Lagos without burning out, and how to stay reliable when power and data are not.

2 hours · 4 modules

TODAY'S RUNNING ORDER

- 2.1** **Global work culture decoded**
Six behaviours that get you kept · 30 min
- 2.2** **Time zones & the remote day**
WAT against London, New York, Toronto, Sydney · 40 min
- 2.3** **Time management that survives NEPA**
Blocks, stand-ups, and contingency · 30 min
- 2.4** **Workshop**
Plan a two-time-zone week · 20 min

MODULE 2.1

Global work culture decoded: six behaviours that get you kept

Ownership over instruction

You own the outcome, not the task list. If the reconciliation needs a source document, you chase it — you do not wait to be told.

Documentation is the culture

If it is not written down, it did not happen. Meeting notes, decisions, and handovers live in shared docs, not in your head.

Honest status, early

'On track', 'at risk', or 'blocked' — said the moment you know. Bad news early is professional; bad news late is a firing offence.

Feedback is direct and normal

A UK manager saying 'this isn't quite right' is coaching, not conflict. Ask what good looks like, fix it, move on.

Deadlines mean the deadline

'Friday' means before their end of day on Friday, in their time zone. If it will slip, renegotiate on Wednesday.

Confidentiality and boundaries

Client data stays in client systems. Working hours are respected both ways — you are not expected to answer at 11pm, and you should not expect it either.

MODULE 2.2

Time zones and the remote day: WAT against the world

Lagos runs on West Africa Time (UTC+1) all year. Your clients move their clocks twice a year — you do not. Learn the two numbers for every client zone.

Client location	Northern winter (Nov–Mar)	Northern summer (Mar–Oct)	Quick conversion	Realistic overlap
London / UK	GMT (UTC+0) · Lagos –1h	BST (UTC+1) · same as Lagos	Their 9:00 = your 10:00 (winter) / 9:00 (summer)	Full day
New York / US East	EST (UTC–5) · Lagos –6h	EDT (UTC–4) · Lagos –5h	Their 9:00 = your 15:00 (winter) / 14:00 (summer)	Your 14:00–19:00
Toronto / Canada East	EST (UTC–5) · Lagos –6h	EDT (UTC–4) · Lagos –5h	Their 9:00 = your 15:00 / 14:00	Your 14:00–19:00
Dubai / UAE	GST (UTC+4) · Lagos +3h	No change	Their 9:00 = your 6:00	Your 8:00–15:00
Sydney / Australia East	AEST (UTC+10) · Lagos +9h	AEDT (UTC+11) · Lagos +10h	Their 9:00 = your midnight / 23:00	Your 8:00–10:00 (their late afternoon)

- Set your calendar to show two time zones (yours + client's). Never convert in your head on a call.
- Write every deadline with a zone: 'Thursday 5pm BST'. Never bare 'Thursday'.
- Australia's DST runs Oct–Apr — opposite to the north. Check the date before you promise a time.
- Protect the overlap window for live work; use the non-overlap hours for deep work and hand-offs.

MODULE 2.3

Time management that survives NEPA: the reliable remote day

A model day for a UK client (BST)

08:30	Power & connection check; open the day's task list; charge everything.
09:00	Stand-up update posted (see format). Reply to overnight messages.
09:30–12:30	Deep-work block: the highest-value deliverable, notifications off.
12:30–13:30	Lunch. Step away from the screen.
13:30–16:00	Overlap block: calls, reviews, questions the client needs live.
16:00–17:00	Close: end-of-day note, tomorrow's list, files saved to shared drive.

THE 3-LINE STAND-UP (POST DAILY, 9:00 CLIENT TIME)

Yesterday: completed Q3 bank reconciliation (3 accounts); variance report sent. **Today:** AP ageing analysis; draft supplier statements by 16:00 BST. **Blockers:** need read access to the Xero contacts module — requested from Tom.

CONTINGENCY: THE PLAN-B CHECKLIST

- Power: inverter or power bank rated for 4+ hours of laptop use; know your nearest co-working space.
- Internet: two providers (fibre or 4G/5G router + a phone hotspot on a different network).
- Device: laptop battery healthy; files synced to cloud so any device can continue.
- Communication: tell the client within 10 minutes of any outage, with a return time.

MODULE 2.4 · WORKSHOP

Plan a two-time-zone week

The brief

You are a KYC analyst placed with a London compliance team (BST) whose head of operations sits in Toronto (EDT). You have:

- A weekly team stand-up London wants at their 9:30.
- A one-to-one Toronto wants at their 10:00 on Wednesdays.
- A report due 'Friday end of day' to Toronto.
- A personal commitment every Tuesday 17:00–19:00 Lagos. **Produce a one-page weekly plan in Lagos time: fixed meetings, two deep-work blocks a day, the overlap window, and the latest safe delivery time for the Friday report. State one assumption you had to make.**

MARKING GUIDE

- Both meetings converted correctly to Lagos time.
- Friday delivery set before 23:00 Lagos (Toronto 18:00 EDT) — with buffer.
- Deep-work blocks placed outside the overlap window.
- Tuesday commitment protected and communicated.
- Assumption stated explicitly (e.g. which DST period).

Homework: set up two-zone display on your own calendar and screenshot it.

DAY 3

AI tools & landing the role

The tools global teams now assume you use, how to use them without leaking client data, how to pass Deeptalent vetting and the client interview — then a live hour on Google Meet to rehearse all of it.

2 hours taught · 1 hour live on Google Meet · 5 modules

TODAY'S RUNNING ORDER

- 3.1 Your AI toolkit**
Drafting, summarising, analysing, checking · 35 min
- 3.2 AI in your function, responsibly**
Finance, compliance, tech, CX · 30 min
- 3.3 Vetting, interviews & offers**
Stages, STAR, video setup, scams · 35 min
- 3.4 Capstone & readiness check**
Assessment and next step · 20 min
- 3.5 Live practical on Google Meet**
Real-time rehearsal with facilitators · 60 min

MODULE 3.1

Your AI toolkit: the assistant, the note-taker, the checker

Job to be done	Tools (free tiers exist)	What a global team expects you to do with it
General assistant	Claude · ChatGPT · Gemini	Draft emails and reports, summarise long documents, explain unfamiliar regulations, write and debug Excel formulas and scripts.
Inside Office / Workspace	Microsoft Copilot · Gemini for Workspace	Formula help in Excel/Sheets, meeting recaps in Teams/Meet, first drafts in Word/Docs — where the client already works.
Meeting notes	Otter.ai · Fireflies · Teams/Zoom AI recap	Transcribe calls, pull action items, and post a summary within 30 minutes of the call ending.
Writing quality	Grammarly · built-in editors	Tone, clarity, and UK/US spelling consistency before anything reaches the client.
Research with sources	Perplexity · Copilot with web	Quick checks on regulations, market data, and tools — always follow the citation to the source.
Visuals & docs	Canva · Gamma · Notion AI	Clean one-page summaries, simple dashboards, and internal documentation.

THE PROMPT FORMULA

Role	"You are a UK management accountant."
Context	"This is a variance report for a 40-person SaaS firm."
Task	"Summarise the five largest variances."
Format	"A table, then three bullet points, under 150 words."
Check	"Flag anything you are unsure of."

Then verify every number, name, and citation yourself. AI drafts; you sign.

MODULE 3.2

AI in your function — and the rules that keep you employed

Finance & accounting

Build and explain formulas, draft month-end commentary, spot anomalies in a ledger export, convert bank statements to structured data — then reconcile by hand.

Compliance & KYC/AML

Summarise regulatory updates, draft policy language, structure case notes, prepare screening questions. Never paste customer PII into a public tool.

Technology & data

Copilot-style code completion, test generation, documentation, SQL drafting, dashboard narrative. Review every line as if a junior wrote it.

CX & operations

Reply drafts in the client's tone, ticket categorisation, meeting minutes, SOP writing, calendar triage. Keep the human warmth; strip the AI blandness.

FIVE NON-NEGOTIABLES

- 1 Client data never enters a tool the client has not approved. Ask in writing.
- 2 Verify before you send. You own the error, not the model.
- 3 Disclose when asked, and when it matters (e.g. drafted with AI, reviewed by me).
- 4 Keep the skill. Use AI to go faster at things you can already do by hand.
- 5 Human judgement stays central — that is Deeptalent's standard and your value.

MODULE 3.3

Vetting, interviews and offers: the last mile

Deeptalent vetting: what happens after you click 'I'm Global Workforce Ready'

01 Apply

Short form: experience, credentials, availability, preferences.

02 Verify

Identity, qualifications, references, and work-readiness checks.

03 Assess

Written task and a structured interview in your specialism.

04 Match

Shortlisted against live client briefs by credentials, not keywords.

05 Client interview

We brief you, coordinate, and debrief.

06 Deploy

Contracting, onboarding and payroll handled. 14–21 days end to end.

Video interview setup

- Camera at eye level, face lit from the front, plain background.
- Wired earphones with a mic; test 10 minutes before.
- Join 3 minutes early; phone on silent; backup hotspot ready.
- Dress as you would for a bank interview in Lagos.

Answer with STAR

- Situation · Task · Action · Result — 90 seconds each.
- Prepare six stories: a deadline, a mistake, a conflict, a process you improved, a tool you learned, a time you said no.
- End every answer with the number or the outcome.
- Ask two questions about how the team works, not about salary — ranges are already published.

Scam red flags

- Anyone asking you to pay for a job, training 'to secure' a role, or equipment upfront.
- Offers without an interview; pressure to act today.
- Pay in crypto or via a personal account; requests for your BVN or passport before an offer.
- Deeptalent never charges professionals to be placed.

MODULE 3.4 · CAPSTONE

Readiness check: prove all six outcomes in one submission

The submission (one PDF, due 48 hours after the live session)

- | | | |
|---|----------------------|---|
| 1 | Profile | Final two-page CV + LinkedIn URL + credentials index (Outcome 1). |
| 2 | Communication | A 120-word email to a UK manager reporting a slipping deadline, with a revised plan (Outcomes 2 & 3). |
| 3 | Time zones | Your Day 2 weekly plan, corrected, with a screenshot of your two-zone calendar (Outcome 4). |
| 4 | AI task | A one-page summary of a 5-page document produced with AI, with your own verification notes and the prompt used (Outcome 5). |
| 5 | Interview | A 90-second recorded STAR answer to: 'Tell me about a time you delivered under pressure.' (Outcome 6). |

HOW IT IS SCORED

70%

pass mark across the five parts, each marked against the module rubric. No part may score zero.

- Pass: you are invited straight into Deeptalent vetting via 'I'm Global Workforce Ready'.
- Near miss: one resubmission within seven days, with written feedback.
- Certificate of completion issued on pass; verifiable by reference number.

MODULE 3.5 · LIVE PRACTICAL

One hour on Google Meet: rehearse the real thing

A live session with Deeptalent facilitators — the first time you will be assessed doing the job, not describing it. Cameras on, mics ready, screen-share tested.

00–10 **Join & tech check**

Everyone joins 5 minutes early. Facilitator checks camera, audio, lighting, and name format ('Firstname Lastname · KYC'). This is Module 3.3's video setup, graded live.

10–25 **Live stand-up round**

Each learner delivers a 3-line stand-up (Yesterday / Today / Blockers) for a given brief, in under 60 seconds, to the room. Peers score point-first, number, pace.

25–40 **AI task, screen shared**

In breakout rooms of three: summarise a 4-page document with an AI tool, verify two facts against source, and present the checked result. One person shares screen; the others review.

40–52 **Mock client interview**

Facilitator plays a UK COO. Two volunteers answer two STAR questions each while the room observes. Immediate feedback on structure and evidence.

52–60 **Ask a placed professional**

A Deeptalent professional already working with a UK or US client joins for Q&A: first 30 days, time zones, what they would do differently.

GOOGLE MEET LOGISTICS

- Meet link and calendar invite sent 24 hours ahead, stated in Lagos time (WAT) and in the facilitator's time zone.
- Laptop, not phone. Wired earphones with mic. Backup hotspot tested before joining.
- Camera on for the full hour; blur or plain background; display name as instructed.
- Session is recorded for assessment — consent is confirmed in the invite.
- Attendance and participation count toward the capstone; a missed session is rescheduled once.
- Google Meet is also the tool most UK SME clients use for interviews — treat this as your first one.

NEXT STEP

Ready is a decision. Make it, then prove it.

After the live session and on passing the capstone, return to deeptalentplatform.com, open the NYSC Corps Members tab, and select I'm Global Workforce Ready. Vetting begins there. Fewer than 8% are accepted — and you now know exactly what the 8% do.

Deeptalent Platform Limited · Mail@deeptalentplatform.com · deeptalentplatform.com
Deeptalent never charges professionals to be trained for vetting or to be placed.

I'm Global Workforce Ready

Verification · Assessment · Match · Deploy
